YellowGate®

YellowGate Fall Protection

Patent Pending Malbec Tensioner

No spring to fail.

The Malbec Tensioner eliminates the need for a swing gate's most common failure point, the spring. The patent pending system provides field adjustable tension and maintenance free closure, every time.

YellowGate can swing either in or out by simply relocating two bolts.

Universal Mount

Mounts to walls, round and square tube and angle iron, with a single mount.

OSHA Regulation

1910.23 Guarding Floor & Wall Openings & Holes

- (a) Protection of floor openings
- (a.2) Guard ladderway floor openings or platforms like a stairway floor opening with passage through the railing either provided with a swinging gate or offset so a person cannot walk directly into the opening.
